“Strawberry Fields”, Jamestown, Enniscorthy, Co. Wexford Y21 N2R5

Kehoe & Assoc. are delighted to present "Strawberry Fields", an exceptional detached residence at Jamestown, Enniscorthy, Co. Wexford. Built in 2019 and thoughtfully extended in 2022 with full planning permission, this impressive home extends to approximately 255 sq. m. and offers a rare combination of generous contemporary accommodation, excellent energy efficiency and a lifestyle centred around sustainability and self-sufficiency.

With an impressive **A3 BER Rating**, "Strawberry Fields" has evolved into a highly efficient family home where renewable energy, productive gardens, rainwater harvesting and home-grown produce sit comfortably alongside modern technology, generous living spaces and dedicated wellness areas. The result is a property designed not simply as a place to live, but as a home capable of supporting a more independent and sustainable way of life.

The accommodation opens through a welcoming entrance hall with double height ceilings and feature stone wall, double doors lead into a superb open-plan kitchen and living space, forming the natural heart of the home. The kitchen, by Michael Farrell, is complemented by excellent storage and utility facilities, while the living area provides an inviting space for everyday family life and entertaining. A Boru stove with back boiler provides an attractive focal point while contributing to the home's heating system. The kitchen is fully equipped with a Boro downward draft induction hob on the island, an American style Fisher & Paykel fridge freezer, Neff double oven and Fisher & Paykel dishwasher drawer.

A separate utility room and shower room add further practicality. The attached garage is fitted with an electric roller door, with a loft area accessed via a stirra staircase providing an exciting additional recreational space with scope for a games room and home cinema.

The ground-floor bedroom accommodation is particularly well considered. Bedrooms benefit from fitted sliding wardrobes, while the principal bedroom incorporates fitted wardrobe storage with an integrated vanity table and a private ensuite featuring a Bristan Bliss electric shower. A family bathroom and hot press complete this section of the accommodation.

One of the home's most distinctive features is the Family Den Wellness Room, conceived as a calm, low-tech wellness and relaxation space. Large picture windows frame views across the gardens, creating a wonderful connection between indoors and out. The adjoining wellness area incorporates a cold-shower facility and space for an infrared sauna, providing the opportunity to create a private wellness retreat at home.

Upstairs, the accommodation continues with a light filled home office area, ideal to suit remote or hybrid working. A fourth bedroom benefits from Velux rooflights with fire-access and provision plumbing is in place for an ensuite, providing excellent flexibility for family life, guests or additional workspace / gym or playroom.

A Self-Sufficient Lifestyle

The grounds at Strawberry Fields have been thoughtfully developed to complement the home's emphasis on self-sufficiency, sustainability and biodiversity. Rather than purely ornamental gardens, the outdoor spaces combine attractive landscaping with productive growing areas and habitats designed to support local wildlife.

Established raised beds provide space for growing strawberries, potatoes, mint, rosemary and other seasonal produce, while the powered greenhouse further extends the growing season. A dedicated rainwater-harvesting system collects water for use within the greenhouse, reducing reliance on the property's private water supply for garden cultivation.

The fertile grounds also incorporate plum trees, blueberries, native Irish oak and specially selected Irish heritage apple trees, including seasonal varieties selected to provide produce at different times of the year.

A purpose-designed enclosure provides for free-range hens or ducks and incorporates an electric hen door, further supporting the property's self-sufficient ethos. Areas of the grounds have also been retained as natural habitat, encouraging biodiversity and providing a seasonal haven for native wildlife and local ducks.

The gardens are predominantly laid in lawn with nitrogen-fixing and drought resistant clover incorporated into the landscape. A wood store and Adman garden shed provide valuable outdoor storage, while a raised landscaped berm along the roadside boundary has been planted to create natural screening, enhance privacy and assist in reducing road noise.

Energy Efficiency & Services

The property's excellent A3 BER rating is complemented by an impressive suite of energy-conscious technology including mechanical ventilation and heat recovery system in place. PV solar panels, an Eddi solar power diverter and Zappi EV charging help maximise the use of renewable electricity generated at the property.

Oil-fired central heating benefits from Hive remote-access controls, while the Boru stove with back boiler provides an additional heating source. A private well supplies the property, with an on-site wastewater treatment plant completing the independent services infrastructure. Fibre broadband ensures the house is equally well equipped for working from home and modern connected living.

Strawberry Fields is much more than an energy-efficient family home. Extending to an impressive c. 255 sq. m., it brings together substantial accommodation, renewable technology, home food production, water conservation, wellness facilities and biodiversity within one thoughtfully developed property.

For purchasers seeking space, sustainability and the opportunity to embrace a more self-sufficient way of living without compromising on contemporary comfort, Strawberry Fields represents a particularly distinctive offering in the Co. Wexford market.

Viewing is highly recommended to fully appreciate the scale, specification and lifestyle opportunity presented by Strawberry Fields.
